Municipal Pipeline Group

Fifteen (15) municipalities in Bergen, Essex, Morris, Passaic, Somerset and Union Counties announced on September 6, 2016 that they have joined together to create the Municipal Pipeline Group. The primary purpose of the group is to ensure that the interests of the affected municipalities and their residents will be protected when Pilgrim Pipeline, LLC applies for permits from the New Jersey Department of Environmental Protection and other governmental regulatory authorities. The group has retained legal counsel and will coordinate activities among the municipalities to protect critical environmental resources.

Learn more about the [Pilgrim Pipeline](#) and how you can get involved.
