ENGINEER'S REPORT FOR THE YEAR 2015

The year 2015 was another year of continued project completion.

The road resurfacing program was completed. The roads that were resurfaced included: Raymond St., Center Ave.(Milton to Yale),Fairview Ave. and Overlook Road. We continued our yearly sidewalk and curb program at a cost of \$150,000.00. This being the second year of the new Ordinance making the Borough responsible for all sidewalk maintenance, we completed repairs in Zone 3, while also handling other areas of concern. Belgian block curbing was installed on several roadways including: Highland Avenue, Kimball Street.

Drainage improvement funding allowed us to target areas affected during heavy rainfalls with new drainage structures and detention facilities including areas on Center Street, Vincent Street, Coleman Avenue, Cherry Lane, John Street, Lincoln Ave. Tallmadge Ave. and N. Summit Avenue.

Thanks to the coordinated efforts of the Chatham and Summit DPW departments ,the Division Ave. parking lot was Re-constructed to the standards put forth by PSE&G.

The Post Office Plaza was updated and improved with the installation of new decorative lighting, sidewalk, landscaping and paving.

Decorative crosswalks were added to Coleman Ave./Main Street intersection, expanding on the existing Main Street streetscape.

Sheppard Kollack field irrigation was upgraded and fencing, dugouts and a batting cage was installed along the newly renovated South field.

This year we will focus on improvements to our water distribution infrastructure, while continuing our comprehensive sidewalk improvement program, supplement existing parking lots and continue improving our curbs and drainage in various areas throughout the Borough.
