“Street Drug” Causing Life-threatening Reactions

Steven Marcus, MD, Executive and Medical Director,
Bruce Ruck, Pharm.D., Director, Drug Information and Professional Education
New Jersey Poison Information and Education System (NJPIES)

Available for Interviews

(Newark, NJ) – April 22, 2015 — The New Jersey Poison Information and Education System (NJPIES), a division of the Department of Preventive Medicine and Community Health of the New Jersey Medical School of Rutgers University Biomedical Health Sciences along with state health officials are warning people not to use products sold as synthetic marijuana (often called spice, k2, etc.).

In the past week, there have been approximately 30 people admitted to hospitals in NJ and many more in NY suffering the consequences of using these products. As of now, no one really knows what is in these substances. However, what is known is that people are getting very sick from it; severe agitation, seizures, renal failure, and other life-threatening reactions are being reported.

Please warn your loved ones about the dangers of these substances. For more information, please contact a poison expert at 800 222 1222.

Help is Just a Phone Call Away!

About NJPIES

As New Jersey's only poison control center, the New Jersey Poison Information & Education System provides information on poison prevention and treatments. Chartered in 1983, NJPIES provides free consultation through telephone hot line services and the Web. Medical professionals such as physicians, registered nurses and pharmacists offer confidential advice regarding poison emergencies and provide information on poison prevention, drugs, food poisoning, animal bites and more. These specialists are available 24 hours a day, seven days a week.

NJPIES coordinates state poison education and research and is designated as the regional poison center by the New Jersey Department of Health and Senior Services and the American Association of Poison Control Centers. It tracks incidences of adverse reactions to food, drugs and vaccines in order to monitor potential public health issues and provide data to the U.S. Food and Drug Administration and the Centers for Disease Control and Prevention. A division of the Department of Preventive

Medicine and Community Health of the New Jersey Medical School of Rutgers, The State University of New Jersey. NJPIES has a state-of-the-art center located on the school's Newark campus. NJPIES is funded, in part, by the NJ Department of Health and the United States Department of Health and Human Services.

New Jersey residents seeking immediate information about treating poison emergencies, and those with any drug information questions, should call the toll-free hot line, **800-222-1222**, any time. The hearing impaired may call **973-926-8008**. For more information, visit www.njpies.org or call **973-972-9280**.

About Rutgers

Established in 1766, Rutgers, The State University of New Jersey, is America's eighth oldest institution of higher learning and one of the nation's premier public research universities. Serving more than 65,000 students on campuses, centers, institutes and other locations throughout the state, Rutgers is the only public university in New Jersey that is a member of the prestigious Association of American Universities.

Rutgers Biomedical and Health Sciences (RBHS) is the health care education, research, and clinical division of Rutgers University, comprising nine schools and their attendant faculty practices, centers, institutes and clinics; New Jersey's leading comprehensive cancer care center; and New Jersey's largest behavioral health care network.
