

Announcement No. 40

Chatham Borough Health Officer reported that thirty-seven (37) residents have tested positive (January 1 - January 7) for the COVID-19 virus for a total of 37 positive cases year-to-date and a total of 282 positive cases from the start of the pandemic. This week's cases include residents whose ages range from 7 to 62 years of age. 1 resident is under 11, 4 residents are under 20 years of age and 32 residents are twenty years or above in age.

As we head into the colder weather where indoor congregating is likely to increase, and as a result of the already increasing number of Covid-19 cases around the state, we are encouraging parents, teens, children and business owners to continue their responsible approach to slowing the spread of Covid-19 by:

- Following social distance guidelines (indoors and outdoors)
- Wearing masks whenever you are around other people. (Including children over two years of age)
- Washing hands often
- Disinfecting frequently touched surfaces
- Staying home if you don't feel well
- Keeping the elderly and those with preexisting conditions distanced

Please continue to do your part for the sake of your family, friends and your community!

We will continue to share information on this and other cases when appropriate.
